EDUCATION

St. John Fisher University | Rochester, NY — Expected May 2027
B.S. Mathematics, Minor in Economics · GPA 4.0

Monroe Community College | Rochester, NY
A.S. Business Administration & Management · GPA 4.0 · Graduated with Distinction · Phi Theta Kappa

EXPERIENCE

Data & AI Co-op, Rich Products Corporation | Buffalo, NY (remote) — May 2026 – Aug 2026

- Built three scheduled Databricks jobs in three weeks (two daily incremental, one weekly full refresh of ~7,000 trade programs) that collect trade programs and deductions from an external portal with Playwright, validate them, and load bronze/silver Delta tables for a production project: an agent to automate accounting's billback and deduction work.
- Fit the jobs to the team's medallion pipeline standards via config files, with Azure Key Vault secrets and least-privilege, guardrailed scraping; worked in the team's Azure DevOps sprints and daily stand-ups.
- Researched fuzzy-matching improvements for entity resolution in a production Master Data Management system spanning millions of records, delivering specific, justified change recommendations to the lead data engineer.
- Independently prototyped a LangGraph conversational agent on Azure Databricks for customer product inquiries, routing each message to purpose-specific prompts, with vector search for context and tool access to product data.
- Co-built a seven-agent LangGraph prototype to automate the IT project lifecycle, from intake through repo scaffolding, Azure DevOps tracking, and deployment, with human-in-the-loop checkpoints; presented to the CIO and VPs at an IT leadership offsite.
- Selected by the team manager to lead three Data & AI co-ops; demoed solo work to the CIO and CGO.

Mathematics Tutor, St. John Fisher University & Freelance | Rochester, NY — Dec 2022 – Present

- Tutor undergraduates across calculus, statistics, and linear algebra.

Commissary Manager, Cousin's Maine Lobster | Rochester, NY — Nov 2024 – Jul 2025

Lead Cook, Hilton Garden Inn | Pittsford, NY — May 2022 – Nov 2024

PROJECTS

- **Customer Churn Prediction** — R, caret. Led model selection and built the random forest and stacked ensemble in a three-person team predicting churn for 10,000 bank customers (AUC 0.87); tuned the decision threshold by ROC analysis, raising churner sensitivity from 78% to 84% at a 5-point specificity cost. Presented at the Fisher Showcase, 2026.
- **Business Website, Mobile Bartending Service** — Cloudflare Workers, Turnstile, GitHub Actions. Built and maintain a live booking site for a Rochester business under a signed, paid maintenance contract, with a Turnstile-protected inquiry form and an owner-only editor that previews content changes and publishes them through GitHub Actions.
- **Cloudflare Application Portfolio** — Workers, D1, R2, Pages, Access. Built nine personal web and desktop apps on Cloudflare. Traced a storage-limit failure to uncompressed audio output, then migrated from Supabase to R2 and D1.
- **Self-Hosted Home Server** — Ubuntu Server, Nextcloud, PostgreSQL. Run a hardened server providing file sync, backups, and network monitoring for a two-person household, kept off the public internet by design.

RESEARCH

- **Senior Capstone: GLCM Texture Features** (in progress; Spring 2027) — Developing a research question on how GLCM texture features aggregate across directions, motivated by machine learning cancer detection in medical imaging.
- **Independent Study (MATH 496): Graph Theory in Agent Design** (in progress; Fall 2026) — Paper, poster, and public talk on graph theory and Markov chains as models of LangGraph agent workflows, applied to a Rich Products agent.

TECHNICAL SKILLS

Languages Python, SQL, R, Bash, PowerShell · Familiar with: JavaScript, Rust
Data Delta Lake, PostgreSQL, pandas, medallion architecture, ETL pipeline design, fuzzy matching & MDM, Playwright
AI/ML LangGraph multi-agent systems, RAG and vector search, LLM application architecture, tidymodels, model validation
Platform Azure Databricks, Azure DevOps, Azure Key Vault, Cloudflare (Workers, D1, R2, Pages), Ubuntu Server, Git

LEADERSHIP & AWARDS

- **President, Mathematics Club**, St. John Fisher University (2026–2027) — relaunching the club after a period of inactivity.
- **Employee of the Year**, Hilton Garden Inn — two-time Employee of the Month.
